Language/Type: ☕ Java basics mystery variables
Author: Marty Stepp (on 2016/09/08)

Rewrite the following code from the previous exercise to be shorter, by declaring the variables together on the same line, and by using the special assignment operators (e.g., +=, -=, *=, and /=) as appropriate.

```java
int first = 8;
int second = 19;
first = first + second;
second = first - second;
first = first - second;
```

shortened code
```
int first =8, second=19;
first += second;
second = first - second;
first -= second ;
```

☑ Sound F/X

🚀 **Submit**

✅ You passed 1 of 1 tests.

Go to the next problem: valuesOfIJK

#	question	your answer	result

1	shortened code	`int first =8, second=19;`
		`first += second;`
		`second = first - second;`
		`first -= second ;`
			✅ pass
