◯ BJP4 Self-Check 2.11: digitExpressions ☆ Favorite

Language/Type: ☕ Java basics mod variables
Author: Roy McElmurry (on 2016/09/08)

Suppose you have an `int` variable called `number`. What Java expression produces the second-to-last digit of the number (the 10s place)? What expression produces the third-to-last digit of the number (the 100s place)? *(Note: Our code checker won't match every possible expression; please come up with the simplest expression using division and modulus.)*

10s place | `number %100 /10` | ☑ Sound F/X

100s place | `number %1000 /100`

🚀 **Submit**

✅ You passed 2 of 2 tests.

Go to the next problem: valueOfX

#	question	your answer	result
1	10s place	number %100 /10	✅ pass
2	100s place	number %1000 /100	✅ pass
